Kids have a lot of problems these days, too!

Like thinking about playing marbles—when their mothers have sent them to the store to buy a particular brand of a particular product!

If they go home with "something else"—look out! It's no wonder the American housewife, whether she sends Sonny to the store, or shops herself, buys

products with manufacturers' names she believes in. For where else in the world do thousands of companies try to outdo each other in making things better at the lowest possible prices? Where else, but under our competitive system, can she take her free choice of so many good things, all made by manufacturers who have pride in their names and the products behind them?

You, the consumer, are the boss in this land of brands! Remember them as you read the advertisements in this newspaper - and trade at the stores where you see them featured.
